About Enterprise Fellowships

Enterprise Fellowships is a 12-month accelerator programme designed to support talented **researchers** and **graduates** to transform breakthrough engineering innovations into disruptive **spinouts and graduate startups**.

Enterprise Fellowships are funded and delivered by the Royal Academy of Engineering Enterprise Hub, and we do not charge fees or take any IP or equity.

We are the experts in commercialising engineering research into successful, scalable businesses through a unique package of funding and training:

- an equity-free grant of up to £75,000
- 75 hours of training
- 1:1 business coaching and mentoring from our unrivalled network of the UK's leading engineers and Royal Academy of Engineering Fellows
- connections to our network of 100+ investors
- subsidised access to our diversity and inclusion platform Culture+ for engineering startups
- lifetime access to our co-working spaces in London and Belfast
- lifelong membership to the Hub's exclusive events and networking.

Apply by 26 February 2024

FIND OUT MORE

Who is eligible?

We are looking for fresh new talent and recognise that you are better placed than most to amplify our reach to as many researchers and graduates as possible.

We are looking for aspiring entrepreneurs who are:

- researchers (from postdoc to professor) working at a UK or Irish university
- non-UK citizens who have, or will soon complete, a PhD at a UK university
- recent graduates of a UK university, who have completed their first degree

We would also love it if you could share this toolkit with **university heads of departments, tech transfer officers,** or university **careers centres** for undergraduate students or **entrepreneurship support.**
